CAREER OBJECTIVE

B.Tech graduate in Electrical & Electronics Engineering, with a robust foundation in Python, SQL, and Excel. Proficient in data cleaning, exploratory data analysis, dashboard creation, and SQL-based reporting using industry-standard libraries such as Pandas, NumPy, and Matplotlib. Reflecting a commitment to continuous learning. Possess a strong analytical mindset, attention to detail, and a passion for uncovering insights that support data-driven decision-making. Eager to contribute to real-world analytics projects and continuously grow in the field of data science

Technical Skills

Programming: Python (Pandas, NumPy, Matplotlib), SQL (MySQL)

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization

Reporting & Tools: Excel (Pivot Tables, Dashboards),Jupyter Notebook

Other Tools: Git & Git Hub (basic)

PROJECTS

Sales & Operations Performance Analysis | Excel, SQL, Python

- Designed an end-to-end data analytics solution by collecting transactional sales and shipment data, cleaning and transforming it using Python (Pandas) and Excel.
- Stored and queried structured data using SQL to analyze sales trends, order status, customer behavior, and product performance.
- Built interactive Excel dashboards with slicers, and visual reports to track revenue, shipment volumes, order status, and monthly performance.
- Performed data validation and exploratory analysis using Pivot Tables and Excel dashboards to cross-check insights and support business decisions.

Coffee Shop Sales Analysis | Excel Dashboard

- Analyzed coffee shop retail sales data using Excel Pivot Tables and Pivot Charts to identify peak sales hours, high-revenue days, and monthly sales trends.
- Built an interactive Excel dashboard with slicers (Month, Day) to track total sales, footfall, average bill per person, and product category performance.
- Derived actionable insights on best-selling products, store-wise performance, and customer purchasing patterns to support business decision-making.

Sales Data Cleaning & Analysis | Python

- Performed data cleaning and preprocessing on raw sales data using Python (Pandas, NumPy), handling missing values, incorrect data types, and duplicates.
- Conducted exploratory data analysis (EDA) using grouping, aggregation, and statistical summaries to identify sales trends, top-performing products, and monthly performance.
- Generated insights on revenue distribution, product demand, and order patterns using Python-based analysis.

Amazon SQL Data Analysis Project | SQL

- Designed and implemented an Amazon-style relational database using SQL to analyze e-commerce sales data.
- Analyzed product-wise and category-wise sales performance using aggregate functions.
- Created tables with primary keys, foreign keys, and constraints to maintain data integrity.
- Performed data analysis using SELECT, WHERE, GROUP BY, HAVING, ORDER BY clauses.

EDUCATION

Bachelor of Technology (B.Tech) - Electrical and Electronics Engineering

MVSR Engineering College (Affiliated to Osmania University) - Hyderabad, Telangana 2020 - 2024

Intermediate - MPC

Sri Gayatri College - Hyderabad, Telangana 2018 - 2020

SSC

Montessori High School - Alampur, Telangana 2018

PROFESSIONAL STRENGTHS

- Adept at designing and developing applications using Pega PRPC.
- Strong skills in debugging and performance enhancement.
- Collaborative team player with excellent communication abilities.

Soft Skills

Analytical Thinking | Communication | Problem-Solving | Attention to Detail | Teamwork | Time Management | Adaptability

CERTIFICATIONS

- Pega Certified System Architect (CSA)
- Completed Pega Training with hands-on project experience.
